

Low Power FM (LPFM) should not be allowed to expand this service in a way that would allow the new LPFM stations to take priority over current FM translator service. Many local FM translators are used in bringing my favorite radio stations' signals, and I don't want them displaced. Radio stations, such as K-Love (that uses FM translators), serves the public interest. Not only do I get to listen to music, but I also listen to news and it's a convenient way to stay current on important issues.
